What happens after I pass the Challenge Phase of Express?

What happens after I pass the Challenge Phase of Express?

Updated over 2 weeks ago

Upon achieving the required account growth and fulfilling the Minimum Trading Days requirement of the Express Challenge, our system will automatically conduct a profit check at the end of that specific day.

If all rules have been adhered to and the profit target has been met, a pop-up message will appear on the trader's Dashboard. This message will grant them access to the verification center, where they can proceed with the KYC verification process.

Please note, if the trader has previously completed the KYC verification process when receiving a Payout from their account, they won't need to repeat the entire KYC process. In such cases, they'll only need to sign the agreement file and submit it.

Upon completing the verification, it typically takes around 24–48 hours to provide the trader with the FundedNext Account.
