What happens if you fail to meet the Consistency Rule in the Challenge and FundedNext Account?

Updated over 2 weeks ago

If a trader is in profit and has fulfilled the Minimum Trading Days requirement but fails to meet the Consistency Rule in their account, their account will be Reset to its initial balance. It's important to note that no profit will be shared and the account balance will revert to its initial amount.

On the other hand, **if a trader is at a loss** or does not meet the minimum trading day requirement while also failing to adhere to the Consistency Rule in their account, their account will be breached. In this scenario, there will be no Reset to the initial balance. Since the trader is in a loss, no Profit Share will be provided and the account will be breached.
