What is FundedNext's server time?

Updated over 2 weeks ago

During daylight saving time, which typically occurs in the summer months, the server time is set to **GMT +3**.

For the rest of the year, when daylight saving time is not in effect, the server time is adjusted to **GMT +2**.

Why is there a difference between the server times?

It's important to note that daylight saving time is a practice of advancing clocks during the summer months to extend evening daylight and conserve energy. FundedNext adjusts its server time based on daylight saving time changes.
