Is there a time limit to reach the Profit Target in the Express Challenge?

Updated over 2 weeks ago

FundedNext recognizes that traders have diverse trading styles and preferences in achieving their profit targets. In both the Express Consistency and Non-Consistency accounts, there is no time limit enforced for reaching the profit target.

Moreover, traders will be glad to learn that there is no monthly profit target specified in the Express Challenges. This offers traders greater flexibility in their trading approach and timeline for achieving their goals.
