# What is the Profit Target of the Express Challenge?

Updated over 2 weeks ago

The profit target for the Express Challenge is outlined as follows:

**Express Challenge Account:** The goal is to grow the account by 25% over time. There is no specific time limit to reach the 25% target; however, a trader must trade in 4-week Trading Cycles and trade for at least 10 days in each cycle.

## Here's an example:

For example, if a trader has a \$15,000 account, they need to make a profit of \$3,750, which is 25% of their initial account balance. This target doesn't have to be achieved in one Trading Cycle. The trader can take as many Trading Cycles as needed as long as they follow the rules and trade for the minimum required days.

**Please refer to the images below for details about the Profit Target of the Express Challenge Phase:**
