# Am I allowed to Merge my accounts in FundedNext?

Updated over 2 weeks ago

Yes, you have the option to Merge your accounts, up to \$300,000, into your FundedNext Account, subject to certain conditions.

Both accounts must be in the same challenge. For example, you can merge an Express Non-Consistency FundedNext Account with another Express Non-Consistency FundedNext Account, regardless of whether you are on the same platform or not (MT4, MT5). However, Merging different challenges is not allowed.

Merging is not permitted if there are any open trades or if the account is in the middle of a trading cycle. Please ensure that there are no open trades and that your account's Trading Cycle is complete before initiating a merge. Accounts with a negative balance cannot be Merged.

Please ensure that you follow the guidelines and contact our FundedNext Support Team if you have any further questions or need assistance Merging your accounts.

## Challenge Phase:

Unfortunately, traders are not permitted to Merge their accounts during any Challenge Phases at FundedNext. Once you receive your FundedNext Account, you will be eligible to Merge your accounts.

## The payout percentage on the Merged account is:

Upon Merging accounts, the profit split percentage will revert to the lower profit split percentage of the two accounts. For instance, if one account has a 90% profit share and the other has 80%, the default payout after Merging will be 80%. However, it is still possible to scale up the newly

Merged account to become eligible for a higher profit split percentage after a 4-month period, provided that all scale-up criteria are fulfilled.

**Note:**

1. In case of account merging, if both of your accounts are MT4 accounts, you will get MT4 accounts after account merging. If both of your accounts are MT5 accounts, you will get MT5 after merging. If your one account is MT4 and another account is MT5, you will get MT5 account after merging.
2. While merging add-on accounts, it is necessary for both accounts to have the same add-on.
3. It is important to note that a 15% profit share from the Challenge Phase is disbursed once you end your Trading Cycle in a FundedNext Account with a 5% growth. However, if you Merge accounts before receiving this 15% profit share, then in order to receive the 15% Profit Share from the account you have Merged, you will need to achieve a 5% growth in your newly Merged account balance.

Please note that for the Stellar 1-Step Account, your FundedNext Account growth must be 10% to receive a 15% profit share from the Challenge Phase.
