What do Active, Inactive, and Breached accounts mean in the FundedNext Dashboard?

What do Active, Inactive, and Breached accounts mean in the FundedNext Dashboard?

Updated over 2 weeks ago

In the FundedNext dashboard, accounts are placed under three categories for easy monitoring:

Active: This category includes accounts currently involved in trading activities. Traders can access accounts actively participating in ongoing trades here.

Inactive: In this category, traders find accounts that have met specific conditions. This includes accounts where the profit target has been achieved or the month has ended with partial profit. After completing a trading cycle, FundedNext accounts temporarily move here for review. Once approved, they're moved back to "Active" start a new cycle. Express Challenge accounts also move here after a cycle but return to "Active" after review.

Breached: Accounts under this category are terminated for violating account rules. However, if someone resets a Challenge Account, it becomes active again and returns to "Active" for a fresh cycle.

These categorizations have been instituted to enable traders to maintain a clear and structured overview of their accounts' statuses and progression within the FundedNext dashboard.
