What happens after I pass the Challenge Phases of Evaluation?

Updated over 2 weeks ago

Once traders successfully reach the profit target of Evaluation Phase 1 by closing all their open trades and trading for a minimum of 5 days, they will discover a button labeled "Start Next Phase" in their account Dashboard. Clicking on this button will immediately grant access to the Phase 2 account.

Alternatively, if traders do not click the Next Phase button, the Phase 2 account will automatically appear on their Dashboard the following day.

Please refer to the image below for details on advancing to the next Phase:

Upon successfully completing Phase 2 of the Evaluation Challenge, the system will perform an automatic profit check at the end of that particular trading day.

If traders have complied with all the rules and have achieved the profit target, a pop-up message will appear on their Dashboard. This message will grant access to the verification center, where they can proceed with the KYC verification process.

Once traders have completed the verification, it will take approximately 24-48 hours to provide them with the FundedNext Account.
