# FundedNext Free Trial Rules

Updated over 2 weeks ago

The Free Trial Account at FundedNext is a unique opportunity for participants to experience real trading conditions without financial risks. It's designed for traders to showcase their skills and understand our platform better. Free Trial Accounts follow a 1-step process.

Here's everything you need to know about Free Trial Accounts:

**Registration:** Each trader in the Free Trial is permitted to register only one account at a time. This account must be unique and associated with a single email and IP address. Once your account is disabled, you may request another, ensuring an opportunity for unlimited free trials while maintaining the integrity of a single, active account policy. After free trial sign-up, users will receive the new account email.

**Profit Target:** The objective for each trader is to achieve a 5% profit on their initial account balance. This target is set to encourage strategic trading and effective risk management.

**Minimum Trading Days Requirement:** Traders are required to trade for a minimum of 3 days within the 14-day trial period. This ensures active participation and provides a fair evaluation of trading skills.

**Daily Loss Limit:** The Free Trial Account has a Daily Loss Limit of 5% of the account balance. This limit refreshes every day after midnight according to the server time.

**Overall Loss Limit:** The Free Trial Account has an Overall Loss Limit of 10% of the account balance.

**Time Limit:** Traders will receive 14 calendar days from the date of the first trade to reach the profit target. After this period, the account will be automatically disabled.

**Weekend Position Holding:** There are no restrictions on holding positions over the weekend.

**Reset Option Availability:** The Free Trial Account does not offer the option to reset the account.

**Account Balance Options:** Account balance options range from \$6,000 to \$200,000, accommodating various levels of trading experience and strategies.

**Account Type and Leverage:** The Free Trial Accounts are swap accounts with a leverage setting of 1:100 for forex instruments, 1:40 for commodities, and 1:20 for indices. This standard leverage is consistent with many professional trading environments.

**Trading Platform:** All trading activities are to be conducted on the MT5 platform.

**News Trading:** The use of news trading is permitted, allowing traders to fully explore various trading methodologies.

**Expert Advisors (EAs):** Usage of EAs is not permissible in the Free Trial Accounts. Traders using Expert Advisors will face restrictions on opening any new trades.

**Maximum Number of Trades:** The maximum number of open positions is 30 at a time. If traders try to open a new position after having 30 open trades, they will not be allowed to open any new trades until the existing trades are closed.

**For more information, kindly refer to the image below:**
