Can I add my FundedNext trading account to Myfxbook?

Updated over 2 weeks ago

To help traders improve and make informed decisions, FundedNext allows them to connect their trading accounts to Myfxbook, a powerful online tool for forex traders. By adding your FundedNext account to Myfxbook, you gain the ability to track your trading activity, analyze your performance, and adjust your strategy as needed. You have two ways to add your FundedNext account to Myfxbook: using only your investor password (not the master password, which is against FundedNext's rules) or by using the Myfxbook EA.

To add your account using only the investor password, you can follow these steps:

- Step 1:** Log in to your Myfxbook account and go to the "Add Account" section.
- Step 2:** Select the broker and the platform that you are using for your FundedNext account.
- Step 3:** Enter your FundedNext account number and the investor password.
- Step 4:** Select the appropriate server for your FundedNext account and click "Add Account."

Once you have added your account, Myfxbook will start tracking your trading performance and generating reports.

Alternatively, you can use the Myfxbook EA to add your FundedNext trading account to Myfxbook. To do this, you can follow these steps:

- Step 1:** Download the Myfxbook EA and install it on your trading platform.
- Step 2:** Open the EA settings and enter your Myfxbook login credentials.
- Step 3:** Start the EA and wait for it to connect to your account and Myfxbook.

By following these steps, you can add your FundedNext trading account to Myfxbook and start tracking your performance using this powerful tool.

For step-by-step guidance on how to add your account via the Myfxbook EA, please check out our tutorial.
