# Will I receive an additional Profit Share if I surpass the profit target amount?

Updated over 2 weeks ago

While FundedNext certainly recognizes and values the trading skills of its traders, it's important to clarify that even if a trader surpasses the profit target and achieves a higher amount, the Profit Share calculation will still be based on the actual profit target. Consequently, the trader will receive a profit reflecting the agreed-upon percentage calculated from the original amount.

## Here is an example:

For instance, let's consider the scenario where a trader purchases a Stellar 1-Step \$100,000 Challenge. The profit target for this Challenge is set at 10% of the initial account balance which amounts to \$10,000. Hence, traders are required to attain a profit of \$10,000 to meet this target.

From the \$10,000 profit target, the trader is entitled to receive a Profit Share of 15%, equivalent to \$1,500.
