# When does the Daily Loss Limit reset with FundedNext?

Updated over 2 weeks ago

Traders are obligated to adhere to the Daily Loss Limit and Overall Loss Limit rules when engaging in trading activities with FundedNext.

The Daily Loss Limit resets at midnight, based on the server's time. Please note that the server time changes depending on whether daylight saving time is in effect or not.

During daylight saving time, which typically occurs during the summer months, the server time is set to Greenwich Mean Time (GMT) +3. This means the daily loss limit resets at midnight GMT+3.

For the remainder of the year, when daylight saving time is not in effect, the server time is adjusted to GMT+2. In this case, the daily loss limit resets at midnight GMT+2.

Traders can easily monitor the countdown timer for the Daily Loss Limit reset on their dashboard to ensure they stay informed and compliant with our established trading regulations.
