How do Non-Consistency Express accounts differ from Consistency Express accounts?

Updated over 2 weeks ago

In a **Non-Consistency Express Account**, traders have the freedom to hold trades overnight and over the weekend without being bound by any Consistency Rule. The FundedNext Account size will be 25% of the Challenge Account size.

While **Consistency Express Accounts** can be advantageous for traders in refining their skills and achieving consistent gains, Non-Consistency Accounts offer flexibility for traders who prefer more freedom in their trading approach.
