What will be my Profit Share from the Express Challenge?

What will be my Profit Share from the Express Challenge?

Updated over 2 weeks ago

With the FundedNext Express Challenge, traders can start earning from the very first month. In the Challenge Phase, traders will earn 15% of the profit generated in each Trading Cycle. Upon growing the account by 25% and receiving a FundedNext Account, traders will unlock a Profit Share of up to 90%.

For instance, let's consider a trader who starts with a FundedNext Account balance of \$100,000. If the trader generates a profit of \$15,000 during a 4-week Trading Cycle, they'll receive a direct Profit Share of 15%, equivalent to \$2,250.

Continuing with the example, if the trader's profit reaches \$15,000 in a \$100,000 account, they'll continue receiving a 15% Profit Share until they reach the 25% growth target. If they generate an additional \$10,000 profit in the following month, they'll receive a straight 15% Profit Share on that amount, contributing to an overall 25% growth in their initial balance.

Once the trader's account achieves 25% growth, they'll be upgraded to a FundedNext Account with an increased Profit Share. They'll receive a 60% Profit Share on their first Payout, followed by 75% on the second Payout, and an impressive 90% Profit Share from the third Payout onwards.

It's essential to note that traders will be eligible for a Profit Share only if they comply with the rules before the Challenge Phase or a FundedNext Account Payout.
