What's in the Toolkit section of the FundedNext Dashboard?

Updated over 2 weeks ago

FundedNext is introducing a new **Toolkit** section to the dashboard, replacing the existing **news calendar**. The FundedNext Toolkit is a collection of widgets designed to help traders enhance their trading experience, accessible directly from the dashboard. The launch will include four widgets: three new ones and the existing News Calendar.

What's in the Toolkit?

News Feed: Real-time news updates are streamed directly into the dashboard, keeping traders informed of the latest market movements.

Forex Matrix: A comprehensive view of the forex market, including currency pairs, exchange rates, and trends, all accessible within the dashboard.

Market Screener: This tool allows traders to define search criteria and scan markets for potential trading opportunities aligned with their strategies.

News Calendar: The existing News Calendar gets a new home within the Toolkit, functioning as a dedicated widget for easy access to upcoming news events that could impact the forex market.

The Toolkit streamlines the user experience by integrating essential tools directly into the dashboard. This eliminates the need to switch between applications or tabs, allowing traders to stay focused and make informed trading decisions.

FundedNext is committed to continuous improvement, and the Toolkit is no exception. In the future, premium widget options will be introduced, allowing traders to further personalize their

trading experience.
