Is there a Minimum Trading Day requirement and Profit Target in the FundedNext Phase of the Stellar Lite Model?

# Is there a Minimum Trading Day requirement and Profit Target in the FundedNext Phase of the Stellar Lite Model?

Updated over 2 weeks ago

In the **FundedNext Phase of the Stellar Lite Challenge**, there is no Profit Target or Minimum Trading Day requirement; however, a specific **Trading Cycle** applies.

After receiving the FundedNext Account, traders' **Profit Share** increases to **80%**. The **first payout** occurs after **21 days**, followed by subsequent payouts every **two trading weeks** (14 days). Additionally, during the **third payout**, traders may request a **Reward Bonus** equivalent to the subscription fee. Once all [Scale-Up criteria](#) are met, the Profit Share increases to **90%**.

For example, let's consider a trader whose first Trading Cycle spans from **May 1st to May 21st**. If they earn a **\$3,000 profit**, after the server reset on May 21st, they can withdraw **80% of their profit (\$2,400)**. Starting with the second payout, profits can be withdrawn every 14 days. Assuming the trader begins trading on **June 1st**, their second Trading Cycle would span from **June 1st to June 14th**, after which they can withdraw their profits. During the third payout, they can request the **Reward Bonus** amount to be added to their payout.
