What details should I provide during FundedNext Dashboard registration?

Updated over 2 weeks ago

A trader must register using his **official** name (as stated in his NID / Passport / driving license). Failure to do so might result in his challenge account not being approved by our **KYC** verification software and **will not be eligible for the FundedNext Account**.

Additionally, the client/trader must include their exact country and address as per their NID/Passport/Driving license during the registration process as well.

> **Note:** Clients are allowed to request minor corrections to their registered name, such as fixing spelling errors or adding/removing a letter.
